TENTATIVE UNDERGRADUATE COURSE OFFERINGS*
 Second Semester, SY 2021-2022

CATALOGUE NUMBER	TENTATIVE SCHEDULE	COURSE DESCRIPTION
SocSci 11	*check AISIS for schedule	<p>Understanding the Self</p> <p>Drawing from interdisciplinary perspectives across the social sciences, SocSci 11 probes and integrates the plural understanding of the self. The course frames the self as a thinking and sensing, affecting and behaving, and physiological and embodied person engaging in meaningful relations within the broader social and cultural worlds that enable and constrain. Through a reflexive process, an embedded and engaged self is expressed, realized and transformed within intersecting personal and social relationships, localities, cosmopolitan spaces, and rapidly shifting technological worlds.</p>
SocSci 12 <i>(prerequisite SocSci 11)</i>	*check AISIS for schedule	<p>The Contemporary World</p> <p>This course explores the making of the contemporary world from an interdisciplinary social sciences perspective, seeking a comprehensive and critical understanding of modernity and its diverse aspects. It examines the cultural, economic, political and social transformations that have shaped the contemporary world and evaluates their effects on social actions, structures, spaces, ideas and institutions. This course also studies the processes that have brought about an increasing consciousness of the interconnections and interrelationships of local peoples and spaces around the globe, as well as dilemmas brought about by such changes and the responses to them. The perspectives and approaches emphasize the interfaces between local and global realities, situating the Philippines and its contemporary challenges amidst these complex processes.</p>
SOCIO 102	TTH 11:00-12:30	<p>Sociology of the Philippines Dr. E Leviste</p> <p>A critical discussion of selected contemporary social issues in the Philippines using sociological perspectives, theories, and social science research methods.</p>
SOCIO 103.2	TBA	<p>Sociological Theories II TBA</p> <p>This course is a study of theories of societies developed in the disciplines of anthropology and sociology in the 19th and 20th centuries, with a discussion of the theorists within their historical milieu, as well as their contribution to the social sciences.</p>

SOCIO 116	TTH 12:30-14:00	Sociology of Inequality Dr. E. Eviota <i>(For Juniors and Seniors only)</i> This course examines the core sociological question of how a few people amassed immense wealth and power more than others. It enquires why opportunities are considerably stacked against significant segments of society. Furthermore, the course studies the social processes and hierarchies of power that produce and reproduce wide resource distribution gaps, paying closer attention to the advantages and disadvantages systematically accorded to people by virtue of their class, status, ethnicity, race, gender, age, and citizenship. How the great imbalances in political, trading, inter-cultural relations between nation-states implicate unequal relations in a locality are also subjects of interest to the course.
SOCIO 192.1	TTH 14:00-15:30	Statistical Analysis for the Social Sciences Ms. J. Claudio This course is an introduction to statistics as a research tool for assessing social phenomena, focusing on selected univariate and bivariate measures, both descriptive and inferential. The approach is non-mathematical, emphasizing the application of appropriate statistical procedures to specific problems.
ANTH 112.1	TH 17:00-20:00	Issue and Debates in Philippine Archaeology Dr. R. Fuentes This course reviews and assesses current research on the archaeology of the Philippines. It will investigate major sites and finds, review the chronology, and facilitate our current knowledge of human evolution, migration and dispersal across the region, identify early maritime interaction, and debate the processes of human colonization and the associated environmental and cultural adaptation to insular environments. It will, furthermore, examine how changes in landscape, sea-level and biodiversity influenced the mobility and successful adaptation of past human populations across the archipelago and investigate the relationship between prehistoric human migrants, palaeoenvironment and fauna in this region.
ANTH 194.1	WED 17:00-20:00	Qualitative Research Methods: Ethnographic Fieldwork Qualitative Methods in the Social Sciences Dr. J. Canuday This course is an analysis of anthropological and sociological works, focusing on the claims and conclusions presented, the research methods used, and the different theoretical approaches employed. The skills needed for qualitative data collection are developed by designing and implementing research projects.

ANTH 132.1 <i>(prerequisite SocSc 11)</i>	TTH 14:00-15:30	Political Anthropology Dr. E. Leviste This course examines power relations between the state and marginalized groups, mediated through business, civil society, and social movements. Notions of inclusive citizenship, human rights, and governance are examined in a cross-cultural context with emphasis on the anthropological perspective on the role of human agency.
SOAN 142.1	MWF 12:00-13:00	Environment and Behavior Dr. L. Lim This course discusses basic ecological concepts currently used yet often poorly understood. The course utilizes case studies to clarify feedback relationships between particular societies and their environment, and then proposes practical research strategies for students to use in conducting anthropological fieldwork with an ecological orientation.
SOAN 173	TTH 11:00-12:30	Special Topics in the Social Sciences: Culture and the Senses Dr. F. Zialcita This course introduces the varied aspects of cultural heritage. Two alternative ways are explored in the course: 1) look for and appreciate the grammar of major human artifacts; and 2) identify the hallmarks of the Filipino sensibility as manifested by vernacular terms and particular artifacts.
SOCIO 199.2 <i>(prerequisite SOCIO 199.1)</i>	TUTORIALS	Directed Research (Thesis II) The second of a two-part integrative course in independent research under the guidance of a thesis adviser which involves the preparation of a thesis.
